## word-initial C loss

V    C    V    C    V  
     |    |    |  
     r    u    x    a

V    C    V    C    V  
  \    |    |    |  
   r    u    x    a

## word-initial C loss

V	C	V	C	V
	r	u	x	a

V	C	V	C	V
	r	u	x	a

(A blue line connects the V above 'r' to the V above 'u' in the second diagram.)

## CriV → CirV

V	C	V	C	V	C	V
	t		r	i		a

V	C	V	C	V	C	V
	t		r	i		a

(A blue line connects the V above 'i' to the C above 'a'. A dashed arrow points from the C above 'r' to the V above 'i'. A solid arrow points from the V above 'i' to the C above 'a'. A curved arrow points from the V above 'i' to the V above 'a'.)

utu → uut in strict CVCV theory (works only in the VC flavour)
